

Math 1332: Worksheet 6

November 3, 2021

Name: _____

1. For this question, consider the following graph, which shows viewer numbers for six games on Twitch, comparing the last week of October to a week in June. (The six games are, in order: League of Legends, Grand Theft Auto: V, Counter-Strike: Global Offensive, Valorant, Fortnite, Minecraft.)

- (a) Which game was the least viewed in June? Which game was viewed least in October?
- (b) Which game was the most viewed in June? Which game was viewed most in October?
- (c) How many fewer viewers did Minecraft have in October versus June?
- (d) Combined, do Valorant, Fortnite, and Minecraft have more June viewers than League of Legends?

2. For these questions, refer to the graph from the first page.

- (a) Among the six games, what was the most views in June and the least views in June?
- (b) What is the mean (average) number of views in June among the six games?
- (c) Among the six games, what was the most views in October and the least views in October?
- (d) What is the mean (average) number of views in October among the six games?
